# Vaughan's Asters

ASTER CALIFORNIA GIANT SUNSHINE

## Tall Section

**California Giant Sunshine Mixed.** They are the result of a cross between the California Giants and Sunshine, hence the name. Plants of this new race grow 3 feet high and bear blossoms on long, stiff stems, admirable for cutting. The individual blooms are enormous, 4 to 5 and 6 inches in diameter.

In point of color the lovely dual-tone effect beggars description. The grace and beauty of build, with cushiony centers of tubular bifurcate petals and the rim of exquisitely-poised outerguard petals surrounding the central disk, make for a lace-like perfection and daintiness of form and contour that must appeal to the most esthetic taste.

With the disk a lovely light-yellow and the encircling guard petals varying shades of Enchantress-pink, apple blossom, deep-rose, blue and lavender, there are produced color contrasts at once startlingly beautiful in the ensemble, stamping this glorious new strain as one of the outstanding acquisitions of modern times to floriculture. . . . 1/4 oz. \$2.00 \$1.00 \$7.50

### CALIFORNIA GIANTS—2 1/2 to 3 feet

No cut-flower grower can afford to overlook these wonderfully fine asters. They are of vigorous growth and of the Crego, or Ostrich, type of flower. They are partially non-lateral and the blooming season extends from midseason until cut down by frost.

### BEAUTY—2 to 3 feet

#### Late-Flowering Type

Plants of branching habit, commencing to bloom in early September and lasting until destroyed by frost. Flowers large, borne on long and stout stems, from 18 to 24 inches.

### CREGO GIANT COMET—2 feet

This flower is giant in size, many blossoms six inches across. The petals are nearly double the length of the older varieties and are twisted and curled into a very fluffy effect. Comes into bloom in August continuing well into September. A splendid keeper and shipper.

### EARLY BEAUTY—2 feet

This type has all of the characteristics of the Late Beauty Type, and is valuable for locations where the season is too short to flower the late type before frost, and for early forcing.

We wish to emphasize, however, that this is not an Early Aster as compared with Early Express or Queen of the Market, but earlier than the Late Beauty Type, which is the latest of all Asters. Planted at the same time this type flowers with the Crego and American Branching.

<b>Hybrida Tubergenii</b> . Richest shades, largest flowering hybrids. Sow seed beginning of April in pots or flats in a mixture of good hot-bed soil and rotted sod. These flats are placed in greenhouse or hot-beds. With a temperature of 10 to 15 degrees the seed will germinate in 4 to 6 weeks if the watering has been properly taken care of. When the seedlings are of sufficient size to be handled they are pricked off in pots or flats or placed 2½ in. apart—here they can remain until the blooming season. Good drainage is of importance otherwise treatment is the same as when raised from bulbs. If sown in April, the plants will bloom in December to January. In order to lengthen the blooming period several sowings 2 to 3 weeks apart can be made.....

## Annual Larkspur

Larkspurs are one of the annuals which have been introduced successfully as a greenhouse cut-flower proposition recently. The ease of culture, short time of production and low initial cost of stock make this one of the best catch crops a florist can plant.

For outdoor blooming start in flats in the house, shift into 2-inch pots and plant in April or sow in the open as soon as ground is ready.

Giant Imperial. A new race of annual Larkspur of upright growth, branching from the base of plant, producing more and longer flower stems for cutting:

## Ornithogalum

In a comparatively short time one can work up quite a stock of these with a small investment for seed. The seeds, if planted in a seed bed in rather a cool temperature and transplanted when large enough, about 50% will flower the second year, full-flowering takes place the third year. It is wonderful cut-flower material, the outstanding feature is their lasting quality after being cut.

# Vaughan's Giant Pansies

## VAUGHAN'S IMPROVED SWISS GIANT MIXTURE

The flowers of this new strain are of enormous size, three inches and over in diameter, they are perfectly round with overlapping petals, borne on strong stalks well above the remarkably luxuriant foliage. The most striking qualities of this strain, however, are the wonderful colors and color combinations—very rare and entirely new—never before seen in Pansies, salmons, pinks, reds. All flowers are 3 or 5-blotched. Excellent for greenhouse culture. Trade pkt., \$1.00; 1/8 oz., \$1.50; 1/4 oz., \$2.50; 1/2 oz., \$5.00; 1 oz., \$10.00.

**Vaughan's 5-Blotched Super-Swiss Giants.** The Swiss Giants as originally introduced by us were mostly 3-blotched. Our grower by painstaking selection has succeeded in fixing a strain that comes 90% 5-blotched and in all the brilliant and unique colors and color combinations of the Swiss Giants having their enormous size of wavy and crinkly flowers. We recommend this strain as distinct and very desirable. Trade pkt., \$1.00; 1/8 oz., \$3.00; 1/4 oz., \$5.00; 1/2 oz., \$10.00; 1 oz., \$20.00.

ACHILLEA, The Pearl

ANCHUSA Dropmore

Sow perennial seeds early so you may winter over larger plants.

## Seeds of Biennials and Hardy Perennials

Perennials form a large and interesting place in the operations of an up-to-date florist establishment. Some are as easily raised as annuals, quite a few may be forced, others make fine pot plants and many furnish splendid cutting material. The rock

garden requirements absorb all the low-growing varieties and the florist with his eye to the future will devote considerable space to perennials of all kinds. They require little heat, if any, and not much care.

## Vaughan's Improved Swiss Giant Pansies

(Flowers About One-third Natural Size)

**S**EVERAL years ago on a European trip we discovered the original Swiss Giant Pansy which has created a sensation wherever grown since. The flowers of this new and improved strain are of enormous size, three inches and over in diameter, they are perfectly round with overlapping petals, borne on strong stalks well above the remarkably luxuriant foliage. The most striking qualities of the strain, however, are the wonderful colors and color combinations—very rare and entirely new—never before seen in pansies, salmons, pinks, reds. All flowers are 3 or 5 blotched. The plants flower early and continuously all season until fall. Also excellent for greenhouse culture. We recommend this strain unreservedly. **Trade**

**pkt.**, \$1.00;  $\frac{1}{8}$  oz., \$1.50;  $\frac{1}{4}$  oz., \$2.50;  $\frac{1}{2}$  oz., \$5.00; oz., \$10.00.

### Vaughan's 5-Blotched Super-Swiss Giants

The Swiss Giants, as originally introduced by us, were mostly 3-blotched. Our grower, by painstaking selection, has succeeded in fixing a strain that comes 90% 5-blotched and in all the brilliant and unique colors and color combinations of the Swiss Giants, having their enormous size of wavy and crinkly flowers. We recommend this strain as distinct and very desirable. **Trade pkt.**, \$1.00;  $\frac{1}{8}$  oz., \$3.00;  $\frac{1}{4}$  oz., \$5.00;  $\frac{1}{2}$  oz., \$10.00; oz., \$20.00.

### Pansy Swiss Alpenglow

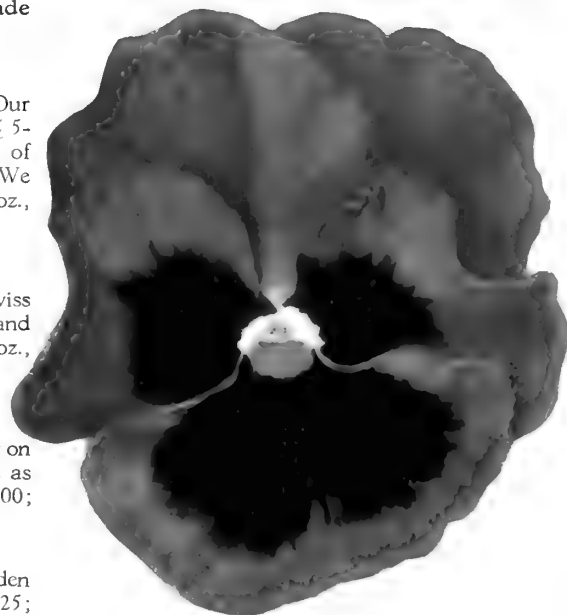

This has the same early, free and almost ever blooming habit as our Swiss Giants (Mixture) but the color is of a rich velvety garnet. A most striking and attractive color. (See illustration). **Trade pkt.**, \$1.00;  $\frac{1}{8}$  oz., \$1.75;  $\frac{1}{4}$  oz., \$3.00;  $\frac{1}{2}$  oz., \$6.00; oz., \$12.00.

### Pansy Swiss Blue (Ullswater Thuner Sea)

Two or three shades darker than Emperor William with a blue-black center on three lower petals, an absolutely distinct shade, velvety texture, same size as Swiss Giants. **Trade pkt.**, \$1.00;  $\frac{1}{8}$  oz., \$1.75;  $\frac{1}{4}$  oz., \$3.00;  $\frac{1}{2}$  oz., \$6.00; oz., \$12.00.

### Pansy Swiss Yellow

The same form and substance of flower as above only color is a clean golden shade embellished by three dark blotches. **Trade pkt.**, \$1.00;  $\frac{1}{8}$  oz., \$2.25;  $\frac{1}{4}$  oz., \$4.00; oz., \$14.00.

This mixture is composed of heavy, re-cleaned seed, blended according to the formula proved in our fifty years' experience to be the best for permanent lawns under American conditions. Recent scientific experiments by the Department of Agriculture confirmed what experience has taught us as to

our formula. Kentucky blue grass and red top form the bulk of this mixture, to which are added white clover in the correct proportion and other grasses to thicken the turf, and assist in establishing the permanent stand of blue grass upon which good lawns depend. Produces a lawn that will endure.

## Vaughan's No. 25 Lawn Mixture

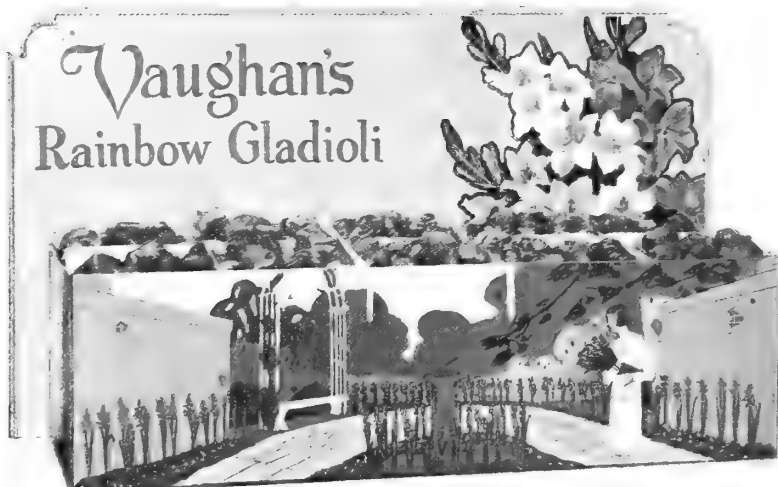

### A New Economy Mixture Containing NO TIMOTHY

We have prepared this blend to fill the demand for a mixture which is both inexpensive and at the same time free of objectionable timothy so widely used as a lawn seed adulterant. Our No. 25 has, as its chief ingredient, the grass which is used for winter putting greens on southern golf courses. It comes up as quickly as timothy, will last longer and makes a fine appearance if kept cut. No. 25 should be cut as soon as it is long enough, and kept short. To obtain the finest texture, it should be cut twice a week. It is a rugged and hardy grass, that will grow under more severe conditions than some of the other lawn grasses. It should be followed by reseedling with Vaughan's Chicago Parks Mixture, containing a large proportion of the permanent Kentucky blue grass. We will gladly send a sample and will appreciate a trial order.

Gladiolus Display Box Holding 500 Bulbs, 50 each of 10 Named Varieties

F. O. B. CHICAGO OR NEW YORK

## Sell Gladiolus Bulbs in Spring

**V**AUGHAN'S RAINBOW GLADIOLI are famous. For years they have been nationally advertised. You have only to put this box on your counter to sell out quickly.

We use specially graded bulbs, the size which do best for outdoor flowering. The 10 named varieties (50 each) include such world-beaters as Mrs. Pendleton, Mrs. Francis King, Herada, 1910 Rose and E. J. Shaylor—none better known. The price to you is \$11.00 for the box and 500 bulbs of 10 named varieties. You retail them for 60 cents a dozen, or more, because the selection is worth more, doubling your money. Each variety is packed 50 in a bag labeled with its name. You empty one bag into a compartment, and refill in the same manner when it is empty. This prevents mixtures and loss of bulbs. Name labels are provided to paste on the compartments. This box keeps the bulbs in the open air, thus preventing bacterial rot which comes when they are sealed in cartons. The named varieties are kept apart without mixing, which adds greatly to their value.

## Caladiums

### Vaughan's Special Fancy-Leaved

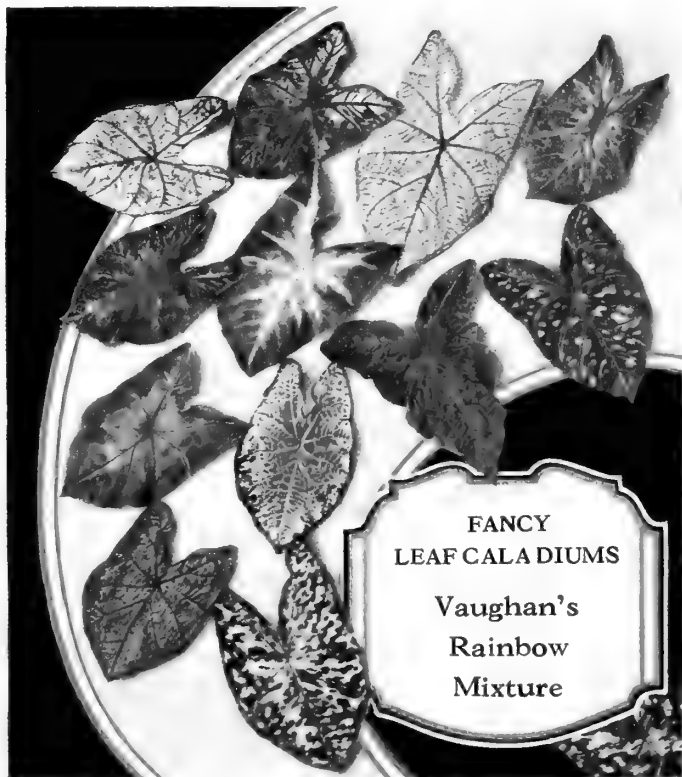

One of the finest summer foliage plants, they should be better known and grown everywhere. Nothing compares with their rich, ornamental coloring and graceful appearance. Easily grown pot plants, selling readily all summer. No florist should be without these highly decorative plants.

Rich ornamental leaves, handsomer than begonias, delicately marbled, veined and striped in every describable shade of pink, red, green and white. Hardly any two leaves just alike and attracting attention everywhere. Used as pot plants for living room, sun porch or store, for shady window boxes and for outdoor bedding in shady positions sheltered from wind.

Start in sand in January or February and shift to pots before leaves unfold.

Our Rainbow mixture is composed of choice dormant bulbs carefully graded in the finest varieties. The Named sorts and Unusual and Rare Varieties are probably the best to be had. All bulbs are good size, clean, healthy and we have discarded old varieties which do not have rich coloring. Shipments start in January and bulbs are available until late March.

# Ornamental and Flowering Shrubs

KOLKWITZIA Amabilis (Beauty Bush)

VIBURNUM Carlesii

OUR shrubs are nursery-grown and are transplanted every two or three years. They are nice, shapely bushes with plenty of good fibrous roots, and are such plants as are in demand by the first-class retail trade. They should not be compared to stock that is never moved from the cutting or seedling beds until sold.

Our Nursery is located at Western Springs, 15 miles west of Chicago on the C. B. & Q. R. R., two blocks south of 47th Street, on Wolf Road.

Visitors are invited to inspect our stock at any time. We have a choice lot of specimens such as are not usually seen. Our customers will be pleased with the class of stock we send them.

# Vaughan's Vigor Strawberry Plants

Grown in Northern Michigan's Ideal Fruit Soil and Climate—Not for shipment after May 15.

Our plants are grown under ideal conditions. Note illustration for root development of a single specimen. They have been developed from selected plants and we know you will be pleased. Varieties below are up to date.

Write for pamphlet on Strawberry Culture.

**AROMA.** (Per.) Late. One of the most popular late varieties. Fruit large to very large; holds its size well throughout all the pickings. Berry is roundish, conical, smooth and perfect in form and of a beautiful bright glossy red in color; very firm and of high quality. Its rich aromatic flavor has suggested its name. The habit of spreading which this variety possesses opens the way for the sunlight to reach the crown. The leaves are broad, clean and smooth and of a dark green color. Price, 100, \$1.40; 500, \$4.50; 1000, \$8.00.

**COOPER.** The large size and the beautiful brilliant color of the berries immediately attracts the attention of every one, but the greatest feature of all is that peculiar mild, delicious flavor not found in any other Strawberry. Due to the wonderful vigor of the plant this variety is adaptable to a wider range of soils and climate than any other variety. The foliage is immense, the big broad leaves often growing a foot high. This is due to the great root system, which goes down for moisture and enables the plants to produce the enormous load of big red berries even during continued dry weather. The unusual vitality of the plant carries every berry to perfect maturity—the last to ripen are as large as the first. Cooper is strongly staminate and can be grown alone and is an ideal mate of any of the pistillate or imperfect varieties due to the long blooming season. Price, 100, \$1.45; 500, \$5.50; 1000, \$9.50.

**DR. BURRELL.** (Per.) Midseason. The berries are large, delicious and beautifully formed. The surface of the berry is a deep glossy red. The meat is solid. If you are looking for a good dependable all-purpose variety you will make no mistake in planting Dr. Burrell. In manner of plant growth this variety closely resembles Senator Dunlap, but will produce more, bigger and better berries, and ripening a few days earlier than Dunlap. Price, 100, \$1.50; 500, \$4.75; 1000, \$8.50.

**GIBSON.** (Per.) Medium early. Berries are large and regular in shape holding their size well to the end of the season. Color rich red. Flavor is neither sweet nor sour, but just right for canning. Extremely productive, in fact we know of no variety that will produce more quarts of berries per acre than the Gibson. It makes a strong vigorous plant that withstands adverse conditions admirably. This variety seems to embody every requirement necessary for a profitable berry. We recommend it and know you will not make any mistake in planting Gibson. Price, 100, \$1.40; 500, \$4.50; 1000, \$8.00.

**PREMIER.** (Per.) Early. Berries are large, beautifully formed, red through and through; flavor delicious. A splendid shipper. The deep heavy rooting system makes the plant a strong drought resister, and it is especially adapted to any soil or climate, giving you a big crop of fancy berries which will sell at highest prices. Where extra fancy early fruit is wanted we advise this. Price, 100, \$1.60; 500, \$5.00; 1000, \$9.00.

**SENATOR DUNLAP.** (Per.) Midseason. The fruit is dark red with glossy finish, shading to a deep scarlet on the underside. The meat is a bright red all through and exceedingly juicy. It succeeds everywhere and with everybody—the new beginner as well as with the veteran grower—but should not be allowed to mat too thickly. For a medium-sized, productive, early-to-midseason berry you need not hesitate to plant Dunlap. One of the best and most popular. Price, 100, \$1.25; 500, \$4.50; 1000, \$7.50.

**PROGRESSIVE.** (Everbearing.) Has long been the leading everbearing variety. It now has to take second place as the new Champion is superior in every respect. The Progressive is a tall, healthy grower, deep rooted and entirely free from fungus diseases. Very productive, berries medium size, good quality and delicious flavor. Price, 100, \$2.00; 500, \$7.00; 1000, \$13.50.

**CHAMPION.** (New Everbearing.) A strong, healthy, deep-rooted plant, very productive. Fruit similar to Dunlap in size, shape and color. A beautiful rich red color clear through, good quality and delicious flavor. The one mighty big feature of the Champion is that every plant bears a full crop of fruit, something that cannot be said of any other everbearing variety. Owing to its wonderful productiveness and its ability to bear through dry weather it offers wonderful possibilities to commercial growers. In addition to the wonderful fall crop produced by the Champion, they are the earliest to ripen in the spring. Price, 100 for \$2.00; 500, \$7.00; 1000, \$13.50.

**MASTODON—Genuine Perfected.** (Everbearing.) The world's greatest everbearer because nothing like it was ever achieved before. Produces nearly 6000 quarts per acre during August, September, October and November. In size, quality, flavor and appearance Mastodon heads the list. Unlike other Everbearers, the plants of Mastodon are large, vigorous, heavily crowned and deep rooted. This explains their ability to produce enormous loads of fine fruit even under adverse conditions. Regardless of your past experience with Everbearing Strawberries we urge you to plant this wonderful New Everbearer this Spring. It will amaze you with the tremendous load of extra fine fruit produced by every plant. Price, 100, \$2.75; 500, \$11.00; 1000, \$20.00.

Vaughan's Extra Select Snowball, pkt., 25c; 1/4 oz., \$1.00; oz., \$3.00; 1/2 lb., \$10.00.

**Vaughan's New Snowball**

One of our Specialties. We know our strain is the equal of any that can be produced. We have tried nearly every other on the market and we have never yet come across anything superior to Vaughan's New Snowball. It is the result of years of careful selection by a most capable and painstaking gardener who grows the seed especially for us on the island of Amager, near Copenhagen, Denmark, where growing conditions are ideal for the production of perfect seed heads. Vaughan's New Snowball is the best general purpose variety for either, spring or fall planting. Heads are usually 9 to 10 inches across, perfectly white, Solid, deep and compact.

Pkt., 25c; 1/4 oz., 75c; 1/2 oz., \$1.35; oz., \$2.50; 1/4 lb., \$8.50; lb., \$32.00.

**Vaughan's Earliest Dwarf Erfurt**

**Bolen's New Model "DJ" All-Purpose Garden Tractor**

For the gardener, the florist, the nurseryman and suburban resident. The BOLENS will plow, disc, seed, cultivate, mow the lawns or operate a mowing machine to cut hay, weeds, etc.

This is just the machine you need; any good-sized boy or girl can run it and do most accurate work. BOLENS is unlike other Garden Tractors because it has a power turn, absolutely accurate tool control, and ample clearance for all crops. There is no other machine like a BOLENS.

We have used BOLENS tractors in our Vaughan's Nursery the past eight years and would not be without it.

Tell us the work you wish to do and we will give prices on the BOLENS and the exact equipment needed to your work.

# VAUGHAN'S HIGH-GRADE FERTILIZERS

Prices for Florists F. O. B. New York on ton lots. Cartage charged on smaller quantities.  
The Yield and Quality of Vegetables Depend Upon Continuous and Rapid Growth

It has been demonstrated that market-garden crops of the best quality are those which are grown under conditions which permit of a continuous and rapid development. Any delay in the growth of a lettuce or radish causes that sharp and pungent flavor of the former and the bitterness and toughened fibre of the latter; beets become stringy, etc. Plant food of the right amount

and kind controls the yield and quality of market-garden products more than any other condition, and it is neither wise nor economical to depend upon the natural condition of the soil or the application of stable manure only for profitable crops.

## VAUGHAN'S LAWN AND GARDEN FERTILIZER (6-8-6)

Six per cent nitrogen; eight per cent phosphoric acid;  
six per cent potash.

This mixture differs from our balanced plant ration, in that it is composed of plant foods in mineral form. The advantages of mineral fertilizer include the absence of objectionable odor, and the quality of being more readily soluble, which makes it more quickly effective upon plant growth.

For a new lawn, broadcast evenly 30 to 40 lbs. per 1000 square feet. To stimulate an old lawn, apply 20 to 30 lbs. per 1000 square feet, and during the growing season, wash it down immediately with the hose to prevent burning. For flowers and vegetables, use from 4 to 6 lbs. per 100 square feet.

5 lbs., 55c; 10 lbs., \$1.00; 25 lbs., \$2.20; 50 lbs., \$3.40; 100 lbs., \$5.20; 250 lbs., \$13.20; 500 lbs., \$25.00; 1000 lbs., \$46.00; 2000 lbs., \$88.00.

It can also be applied as a liquid manure by using an 8-inch potful to a barrel of water. 25 lbs., \$1.40; 50 lbs., \$2.25; 100 lbs., \$3.85; 500 lbs., \$17.00; 1000 lbs., \$32.00; 2000 lbs., \$58.00.

(Over)

**FOR WHOLESALE  
TRADE ONLY**

**All Prices Subject to Change Without Notice.**

THE following bulbs are either grown by ourselves on our own farms or on contract with experienced growers in the locality best adapted for their cultivation. Those classes like Hybrid Amaryllis, Begonias and Gladiolus, which can be improved by pollenization of class breeding are being noticeably improved each season by our growers.

## VAUGHAN'S NEW HYBRID AMARYLLIS

One of the first strains of Amaryllis we have ever seen, raised by two eminent growers whose entire stock and hybridization for a dozen years we have purchased in its entirety. Flowers are immense, borne mostly four to a stem, in an amazing and beautiful range of colors, blended, splashed and striped in a manner not seen in other strains. The bulbs are 2 inches and up; are sure bloomers. Try 25 or 50; will retail quick at \$1.00 to \$1.50 in bloom.
